Winston Ngoui
Game Designer

Singapore | +65 9173 6633 | winston.ngoui@gmail.com | winston-ngoui.github.io

Profile

Game Design student at DigiPen Institute of Technology Singapore with hands-on experience designing, prototyping, and implementing gameplay systems in Unity and C#. Interested in creating engaging gameplay mechanics, building cohesive game systems, and refining player experiences through playtesting and iteration. Experienced in systems and level design, design documentation, and cross-functional collaboration, with additional experience leading teams and coordinating development priorities.

Education

Bachelor of Arts in User Experience and Game Design - DigiPen Singapore
- 2024 - Present | Expected graduation in 2028 | GPA: 4.69 / 5

Diploma in Game Development Technology - Nanyang Polytechnic
- 2018 - 2021 | GPA: 3.45 / 4

Projects

Spellwright (Sep 2026 - Present)
Design Lead & Product Manager | Team of 8
- 3D Roguelike developed in Unity.
- Designed a spell-crafting system that allows players to adapt their builds to each run, encouraging experimentation rather than reliance on fixed presets.
- Developed distinct strengths and weaknesses for spells to create varied combat experiences.
- Prototyped and implemented gameplay systems in Unity and C#, documented mechanics, and guided design iterations while coordinating team priorities and feature scope.

Soot & Scoot (Sep 2025 - Mar 2026)
Design Lead & Product Manager | Team of 8
- 2D Stealth game developed in a custom engine.
- Designed the core gameplay premise where rescuing more friends increases the difficulty of the run.
- Built a Unity prototype with C#, documented gameplay mechanics, and designed levels to introduce and progressively challenge the stealth gameplay loop.
- Designed multi-state enemy behaviours and coordinated with gameplay programmers to translate gameplay concepts into the team's custom engine implementation.

Toxic Tide (Jan 2025 - Mar 2025)
Technical & Gameplay Designer / Project Manager | Team of 5
- 2D Endless Runner developed in Unity.
- Designed and implemented gameplay systems in Unity and C#, working with teammates to bring mechanics from concept into playable features.
- Supported feature scoping and development planning to maintain a feasible workload.

Groovity (Apr 2026)
Development Lead | Team of 5
- 3D Puzzle Platformer developed in Unity.
- Coordinated development and feature implementation within a one-week game jam (Century Games Game Jam 2026).
- Delivered a playable prototype under a highly compressed development timeline.

Work Experience

iMMERSiVELY (Aug 2021 - Sep 2021) | Solo Developer
- Developed and delivered a client-facing VR application using Unity and C#, translating project requirements and feedback into functional features.
- Managed implementation, testing, iteration, and final delivery independently.

Skills

Game Design: Gameplay Systems Design | Level Design | Game Balancing | Playtesting & Iteration | Design Documentation
Technical Game Design: Unity | C# | Gameplay Prototyping & Implementation | Git
