

Winston Ngoui

Game Producer | Technical Game Designer

Singapore | +65 9173 6633 | winston.ngoui@gmail.com | winston-ngoui.github.io

Profile

Game Producer and Technical Game Designer with experience coordinating team-based game projects from planning through implementation. Experienced in sprint planning, task coordination, feature scoping, playtest execution, bug tracking, and cross-functional collaboration. Hands-on experience developing gameplay systems in Unity and C#, with a strong interest in game production, development operations, and live service development.

Education

Bachelor of Arts in User Experience and Game Design – DigiPen Singapore

- 2024 – Present | Expected graduation in 2028 | GPA: 4.69 / 5

Diploma in Game Development Technology – Nanyang Polytechnic

- 2018 – 2021 | GPA: 3.45 / 4

Projects

Spellwright (Sep 2026 – Present)

Product Manager & Design Lead | Team of 8

- 3D Roguelike developed in Unity.
- Coordinated sprint planning, weekly task allocation, and development priorities for an 8-person team.
- Lead team meetings for concept development, rapid prototyping, and stakeholder pitching.
- Track feature scope and development progress to support milestone delivery.

Soot & Scoot (Sep 2025 – Mar 2026)

Product Manager & Design Lead | Team of 8

- 2D Stealth game developed in a custom engine.
- Coordinated sprint planning, task allocation, and day-to-day development for an 8-person team.
- Oversaw development from concept and prototyping through implementation, coordinating priorities and feature scope across the team.
- Conducted playtesting and iterated on gameplay based on findings.

Toxic Tide (Jan 2025 – Mar 2025)

Project Manager & Technical/Gameplay Designer | Team of 5

- 2D Endless Runner developed in Unity.
- Coordinated task planning and feature scoping to support on-time, feasible delivery.
- Developed gameplay systems in Unity and C#, while collaborating with the team on implementation and iteration.

Groovity (Apr 2026)

Development Lead | Team of 5

- 3D Puzzle Platformer developed in Unity.
- Coordinated development and feature implementation within a one-week game jam (Century Games Game Jam 2026).
- Delivered a playable prototype under a highly compressed development timeline.

Work Experience

iMMERSiVELY (Aug 2021 – Sep 2021) | Solo Developer

- Developed and delivered a VR application for a client, iterating on features based on requirements and feedback.
- Managed development from implementation through testing and delivery using Unity and C#.

Skills

Game Production: Sprint Planning | Task Coordination | Feature Scoping | Playtest Execution | Cross-functional Collaboration | Agile/Scrum

Game Development: Unity | C# | Gameplay Systems | Prototyping | Git
